A moment in time...

As Goldman Sachs Partner, Andrew Sheets summarizes this week, it certainly feels that way at the moment in markets to global equity markets...

正如高盛合伙人 Andrew Sheets 本周所总结的那样，目前市场情绪确实如此，全球股市...

The **worries about inflation, rates, oil, Middle east, debt, stimulus, or tariffs** are gone.

对通胀、利率、油价、中东局势、债务、刺激政策或关税的担忧已经消失...

...it seems the **world has decided to focus on greed over fear... sentiment** is now the key driver of markets.

...这表明世界已决定更关注贪婪而非恐惧...情绪现在是市场的关键驱动因素。

And it's not...much debate around whether what we are watching rhymes with what we saw in 1999!!!...

而且……关于我们现在看到的与 1999 年所见是否相似，并没有太多争论！！！……

Some pointing to the "extreme irrational exuberance" comments, ...and how early they were. Others to the "internet changing the world" comments, ...and how right they were.

有些人指向“极度非理性的繁荣”的评论，……以及当时的时机有多早。另一些人则指向“互联网改变世界”的评论，……以及当时的判断有多正确。

Even if both were bets on the future, ...and this **turns out to be a bubble...this has been an earnings bubble, not a valuation bubble.**

即使这两项都是对未来的押注，……而且这最终证明是一个泡沫，……这也是一个由盈利驱动的泡沫，而非估值泡沫。

What is also clear, is that **narrowness and concentration** have been a key focus of a bull.

同样显而易见的是，市场的狭窄性和集中度一直是牛市的关注焦点。

The Top 10 companies in the S&P now account for 40% of the index's gains in 2024, and the top 4 are a bearing of 4 shared market of here and here and here and here and here and here.

标普 500 指数中排名前 10 大公司的市值占过去一年指数涨幅的 40%，而前 4 大公司的市值占比则在这里、这里、这里、这里、这里、这里和这里。

Even if both were bets on the future, ...and this **turns out to be a bubble...this has been an earnings bubble, not a valuation bubble.**

即使这两项都是对未来的押注，……而且这最终证明是一个泡沫，……这也是一个由盈利驱动的泡沫，而非估值泡沫。

Beneath the hood, it's the same.

We have the **structural tailwind of all things AI...**

与此同时，人工智能领域正在经历结构性顺风……

...from hyperscalers' capex budgets, to power, to computers, ...and more recently memory.

……从超大规模云服务商的资本支出，到电力，……再到最近的内存。

Then we have the **more cyclical, somewhat procyclical, price pause in the middle east with Oil down meaningfully in 2024.**

接着是中东地区更具周期性、略带顺周期性的价格暂停，2024 年石油价格大幅下跌。

Yields, though **little moved** from where we started the year, have been **volatile and range bound.**

收益率虽然从年初至今变动不大，但**波动剧烈且区间震荡。**

若要使此段话的逻辑更加清晰和流畅，可以这样表述：

尽管收益率从年初至今变动不大，但其波动剧烈且区间震荡。

这样既保留了原意，又通过连接词使前后文更连贯。

And that's not even to mention the **tariff** and **tax** narratives that have yet to hold out false trade.

最后，我们甚至还没有提及关税和税收方面的叙事，这些叙事尚未兑现。

...and a **US economy** that's kind of hovering between soft and hard landing.

……以及美国经济似乎在软着陆和硬着陆之间徘徊。

Material shorts building in spaces that you wouldn't traditionally expect.

在一些传统预期之外的领域，正在悄然积累大量空头仓位。

Even if both were bets on the future, ...and this **turns out to be a bubble...this has been an earnings bubble, not a valuation bubble.**

即使这两项都是对未来的押注，……而且这最终证明是一个泡沫，……这也是一个由盈利驱动的泡沫，而非估值泡沫。

Bitcoin has **rallied** to **$100k**, **gold** to **$2,800**, **Nasdaq** to **21,000**, **Dell** to **$200**, **Tesla** to **$500**, **Nvidia** to **$200**, **Palantir** to **$100**, **Vanguard** to **$300**, **Blackrock** to **$1,000**, **Goldman** to **$700**, **Amazon** to **$300**, **Meta** to **$800**, **Google** to **$300**, **Microsoft** to **$600**, **Apple** to **$300**, **Berkshire** to **$700**, **Costco** to **$1,000**, **Walmart** to **$200**, **Eli Lilly** to **$1,000**, **Novo Nordisk** to **$200**, **Visa** to **$400**, **Mastercard** to **$700**, **Netflix** to **$1,500**, **Uber** to **$100**, **Airbnb** to **$200**, **Doordash** to **$300**, **Coinbase** to **$500**, **Robinhood** to **$100
