From AI-Rotation To Rising Retirees: Here's The Charts That Goldman Traders Are Watching Into The Weekend

BY TYLER DURDEN

SATURDAY, JUNE 28, 2025 - 03:00 AM

From record equity supply to record Ai CapEx and from record US exceptionalism to record bearishness on currency markets, there are many charts to absorb over the next few days.

以创纪录的股票供给到创纪录的 AI 资本支出，从一个极为看好美国到对这种态度极为悲观的货币市场，未来假设有很多图表要消化。

What follows is Goldman Sachs traders' selection of the most interesting graphics that drew the most attention recently...

以下是高盛交易员挑选的近期最受关注、最有趣的图表...

Goldman's Jacob Manheimer notes that they have seen continued demand in US info tech where our PB data shows investors are now in the 96th pctile of net long.

高盛的 Jacob Manheimer 指出，他们看到对美国信息技术的持续需求，我们的 PB 数据显示投资者现在处于净多头的第 96 个百分位。

The market has rewarded the producers (i.e Semis companies) instead of the spenders (Hyperscalers).

市场奖励了供应商（即半导体公司），而非支出（超大规模企业）。

Chip manufacturers appear to have benefited from AI capex, while investors have questioned the hyperscalers' return on investment.

芯片制造商似乎已从 AI 资本支出中获益，而投资者则对超大规模企业的投资回报率表示质疑。

Relative price performance of US Semiconductors vs US Hyperscalers (LHS) versus MSCI USA Semiconductors

美国超大规模企业（AMZN、META、GOOGL、MSFT、ORCL）相对于 MSCI 美国半导体的相对价格表现（LHS）
