Lift PO to CNY1,650: full-stack optic supplier riding on stronger cycle

Reiterate Rating: BUY | PO: 1,650 CNY | Price: 1,180 CNY

Raise earnings estimates and PO to CNY1,650

We raise our 2026-28E earnings by 16-70% to reflect strong 1.6T demand into 2027 and rising contribution from new solutions. We expect 1.6T/NPO to contribute ~68%/~14% of Innolight's revenue in 2027. We lift our PO to CNY1,650 (25x 2027E P/E) from CNY1,100 (30x 2H26-1H27E P/E). We lowered our P/E target multiple to reflect the market's forward looking on earnings amid extended lead-time as well as lingering debates around CPO. We see market tend to value more on further earnings upside for transceiver makers and more discussions around new techs could warrant further share price upside. Reiterate Buy.

Pluggables demand trending stronger

We expect 1.6T demand to trend even stronger into 2027 and last into 2028, proved by upstream suppliers' extended backlog: (1) Tower Semi's US\$1.3bn contracts for 2027 and larger commitment for 2028; (2) Lumentum's capacity fully booked through 2028; and (3) higher supply/demand gap to over 30%. We also see stronger Google TPU volume as another driver to 1.6T volume, and we expect global 1.6T shipment to reach 20mn/56mn units in 2026/27, while we expect Innolight to maintain over 40% share into 2027.

New solutions: NPO visibility improving, CL emerging

NPO demand is becoming increasingly visible in 2027, and we expect more than one CSP to deploy NPO in its scale-up systems. Based on our analysis, each 5mn-unit NPO order could generate CNY10bn+ in earnings for Innolight. We are also seeing growing market discussions around a 2.4T Coherent-Lite (CL) solution, which could potentially be deployed by Google. This suggests that high-value Coherent solutions are moving from scale-across to scale-up architectures. We note that the Coherent optics market remains largely dominated by US vendors, while Innolight is one of the few China suppliers. We believe Innolight could be a key beneficiary of Google's potential Coherent-Lite adoption into 2027-28, backed by its deep relationship with Google.

Company Description

Zhongji Innolight, a China-based high-speed optical transceiver solution provider, was founded in 2008 and listed in 2017 (via a reverse takeover). Innolight is now tied as the largest optical transceiver provider globally. It has a complete product portfolio for datacenter, 5G, networking and fiber to the home. Its key customers are mainly US hyperscalers and GPU providers.

Investment Rationale

We have a Buy rating on Zhongji Innolight. Innolight, the global number-1 optical transceiver supplier, is a key beneficiary of the AI uptrend, led by (1) rapidly rising volume/content at transceivers and (2) its strong project line-up.

Earnings upgrade, PO to CNY1,650

We raise our 2026-28E earnings by 16-70% to reflect the strong 1.6T demand into 2027 and rising contribution from new solutions. We expect 1.6T/NPO to contribute ~68%/~14% of Innolight's revenue in 2027. We lift our PO to CNY1,650 (25x 2027E P/E) from CNY1,100 (30x 2H26-1H27E P/E). We lowered our P/E target multiple to reflect market's forward looking on earnings amid extended lead-time as well as lingering debates around CPO. We note Innolight has traded above 27x (+1SD) previously but given more crowded market and lingering concern on Nvidia's CPO adoption, we view market tend to focus more on what can drive further earnings upside. Thus, surprise on earnings and more discussions around new techs should warrant further share price upside.

Pluggables trending stronger, NPO taking off

We expect 1.6T demand to trend even stronger into 2027 and last into 2028, as indicated by upstream suppliers' extended backlog. We expect global 1.6T shipments to reach 20mn/56mn units in 2026/27, while we expect Innolight to maintain over 40% share into 2027.

Besides pluggables, NPO demand is becoming increasingly visible into 2027, and we expect more than one CSP to deploy NPO in its scale-up systems. Based on our analysis, each 5mn-unit NPO order could generate CNY10bn+ in earnings for Innolight, assuming USD1,000 ASP and similar 30% net margin. We are also seeing increasing market discussion around a 2.4T Coherent-Lite solution, could potentially be deployed by Google. This suggests that high-value Coherent solutions are expanding from scale-across to scale-up architectures. We note that the Coherent optics market is largely dominated by US vendors, while Innolight is one of the few China suppliers. We believe Innolight could be a potential beneficiary of Google's Coherent-Lite take-off into 2027-28, backed by its deep relationship with Google.

Zhongji Innolight (XZICF)

We set our PO at CNY1,650 (25x 2027E P/E). 25x is slightly below +1SD of Innolight's trading average since 2021 (27x). We think 25x is justified by strong orders, Innolight's leading position in the spec upgrade cycle, as well as its solid expected sales/earnings expansion in the next 2-3 years.

Downside risks: (1) slower demand at AI, leading to slower 400G/800G/1.6T and NPO adoption by key customers, (2) faster-than-expected ASP erosion at high-end products, leading to weaker margin, (3) peers' faster entry into high-end market, causing market share and ASP pressure, and (4) faster adoption of CPO.

Upside risks: (1) stronger demand at AI, leading to faster 400G/800G/1.6T and NPO adoption by key customers, (2) better ASP profile at high-end products, leading to stronger margin, (3) less competition in the high-end market, and (4) slower adoption of CPO.

Equity Investment Rating Distribution: Global Group (as of 31 Mar 2026)

Coverage Universe	Count	Percent	Inv. Banking Relationships ^{R1}	Count	Percent
Buy	1993	55.76%	Buy	1186	59.51%
Hold	821	22.97%	Hold	509	62.00%
Sell	760	21.26%	Sell	400	52.63%

^{R1} Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. **VOLATILITY RISK RATINGS**, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. **INVESTMENT RATINGS** reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster ^{R2}
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

^{R2} Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. **Coverage Cluster** is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

Price Charts for the securities referenced in this research report are available on the [Price Charts website](#), or call 1-800-MERRILL to have them mailed.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BoFA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BoFA Securities is not responsible for such terms and privacy policies and expressly disclaims any liability for them.

All opinions, projections and estimates constitute the judgment of the author as of the date of publication and are subject to change without notice. Prices also are subject to change without notice. BoFA Securities is under no obligation to update this information and BoFA Securities ability to publish information on the subject issuer(s) in the future is subject to applicable quiet periods. You should therefore assume that BoFA Securities will not update any fact, circumstance or opinion contained herein.

Subject to the quiet period applicable under laws of the various jurisdictions in which we distribute research reports and other legal and BoFA Securities policy-related restrictions on the publication of research reports, fundamental equity reports are produced on a regular basis as necessary to keep the investment recommendation current.

Certain outstanding reports or investment opinions relating to securities, financial instruments and/or issuers may no longer be current. Always refer to the most recent research report relating to an issuer prior to making an investment decision.

In some cases, an issuer may be classified as Restricted or may be Under Review or Extended Review. In each case, investors should consider any investment opinion relating to such issuer (or its security and/or financial instruments) to be suspended or withdrawn and should not rely on the analyses and investment opinion(s) pertaining to such issuer (or its securities and/or financial instruments) nor should the analyses or opinion(s) be considered a solicitation of any kind. Sales persons and financial advisors affiliated with BoFAS or any of its affiliates may not solicit purchases of securities or financial instruments that are Restricted or Under Review and may only solicit securities under Extended Review in accordance with firm policies.

Neither BoFA Securities nor any officer or employee of BoFA Securities accepts any liability whatsoever for any direct, indirect or consequential damages or losses arising from any use of this information.
